# Fluid States North: Calls for participation and presentation

Fluid States North is the North Atlantic cluster of P*S*i Fluid States. It will take place simultaneously at three different island locations in the the Nordic region:

Faroe Islands (Thorshavn), Greenland (Nuuk) and Amager (Copenhagen).

Through artistic and performative encounters, Fluid States North explores telematic tangibility and intimacy despite distance.

Fluid States North calls for participation and presentations from scholars, artists, performers, activists, and any other person(s) who has an interest in performance studies.

You can participate in one of four events at one of three Nordic island sites:

- Pantopia Telematic Encounters in Torshavn (Faroe Islands)
- Sisters Academy in Nuuk (Greenland)
- Fluid States - Solid Food on Amager (Denmark)
- Fluid Sounds on Amager (Denmark)

We especially encourage **combinations**: you can travel and be physically present at one event, and perform or present within the framework or topic of another event - by using the digital communication equipment available to set up a telematic encounter. For example travel to the *Pantopia* café in Torshavn and perform a cooking lesson, which is transmitted live through the digital media to the temporary kitchen in *Fluid States - Solid Food* in Copenhagen. Or enroll at the *Sisters Academy* and produce an audio paper of your experience to be presented telematically at *Fluid Sounds* in Copenhagen.

**Deadline for proposals:** October 30, 2014.
